

## Construction Sector

Increase in projects with **'green design'** and sustainable products. The motto is **Recycle, Reuse, Reduce and Rethink**

## 'MODULAR'

is the buzz word. **Modular buildings and homes** are gaining preference among start-ups, younger professionals and millennials **constantly on the move**

**Technology** is playing a major role in the sector and new gadgets, machinery and techniques are taking over **from traditional tools and methods**

**33%**

Increase in Design-build, **public-private partnerships** and integrated project delivery. Collaboration is the new mantra for building **state-of-the-art structures**

## ELECTRICITY FOR ALL

The government is focusing on the construction of power plants and transmission grids to provide electricity to every part of the country by 2022

## Need of the hour

- India needs to develop a workforce that is adequately trained and qualified to execute modern construction work with diligence.
- Construction workers must understand safety procedures and leverage technology to fulfill the industry demand
- Builders and developers need to invest in skilling and reskilling the workers to ensure high quality delivery

## LabourNet's Impact

**1.85+LAKH** Livelihoods Impacted

LabourNet conducts various programs to skill and reskill the construction workers in the following trades
